Ejercicio - 3

```
Import java.io.*;
Public class Maximo
       public static void main (String args[]) throws IOException
       BufferedReader entrada = new BufferedReader (new InputStreamReader (System.in));
       int x,y,z,max;
       System.out.println("Introduce x,y,z: ");
       x = Integer.parseInt (entrada.readLine());
       y = Integer.parseInt (entrada.readLine());
       z = Integer.parseInt (entrada.readLine());
       if (x>y && x>z)
                     max = x;
       else{
              if (z>y)
                     max = z;
              else
                     max = y;
       System.out.println ("El máximo es "+ max);
       } //main
}
```
